

The Muskat problem with surface tension and a nonregular initial interface,
Journal of Nonlinear Analysis: Theory, Methods and Applications, 72 (2011), 6074-
6096. (N. Vasylyeva)

Abstract

In this paper, we consider the two-dimensional Muskat problem with surface tension on a free boundary. The initial shape of the unknown interface has a corner point. We prove that the problem has a unique solution in the weighted Hölder classes locally in time and specify the sufficient conditions for the existence of the "waiting time" phenomenon.
